Education

Indira Gandhi Delhi Technical University for Women

Bachelor of Technology, Major in Computer Science and Engineering - **9.31/10.0 CGPA**

Delhi, India

2025 - May 2029

Delhi Public School, Rohini, Intermediate

All India Senior School Certificate Examination - **96%**

New Delhi, India

2024 - 2025

Delhi Public School, Rohini, Matriculation

All India Secondary School Examination - **96.6%**

New Delhi, India

2022 - 2023

Experience

ML & GenAI with Python Internship | IGDTUW

June 2026 - Present

Research Project: AI-Generated Text Detection using NLP & ML — under faculty evaluation

- Built a binary text classifier distinguishing AI-generated from human-written text on a 79K-sample dataset, benchmarking 6 ML models (SVM, XGBoost, LightGBM, Logistic Regression, Random Forest, Naive Bayes) with TF-IDF features in a team of 3

Projects

Civitas.AI | React, Firebase, Gemini 1.5 Flash, Leaflet.js | [GitHub](#) | [Live Demo](#)

June 2026

AI-powered civic issue reporting platform for Indian cities

- Engineered an image-classification pipeline using the **Gemini 1.5 Flash API** to auto-categorize citizen-uploaded civic complaints, assign severity levels, and route them to the correct government department in real time
- Architected a **dual-portal system** with role-based access control — a citizen-facing web app with live map visualization (Leaflet.js) and community upvoting, plus a government dashboard for department-scoped issue tracking
- Implemented **Firebase Firestore** and **Firebase Auth** for real-time data sync and secure authentication, scaling the platform's data model across 10 Indian states

Vinetra.AI | JavaScript, MediaPipe.js, HTML, CSS | [GitHub](#)

Feb 2026

AI Platform for Skill Development and Error Minimisation in Sports — Synapse.AI Hackathon 2026

- Led a 4-member team to develop a real-time **computer vision** system for cricket batting-technique correction, using **MediaPipe pose estimation** to track 17 body keypoints and score joint angles (knee bend, back alignment, elbow position, balance)
- Built a Gemini-powered AI **coaching module** delivering personalised nutrition, recovery, and drill recommendations based on the athlete's profile and skill level
- Won **Best All Girls Team** at Synapse.AI 2026, a 24-hour offline hackathon organised by DTU

Voyage-AI | React, TypeScript, Vite, Express, Gemini API, SerpApi, Google Distance Matrix API | [GitHub](#) | [Live Demo](#) July 2026

AI-powered travel planning agent that autonomously researches and selects flights and hotels using live data

- Developed a multi-turn, tool-calling **LLM agent (Gemini API)** that autonomously queries flight/hotel search tools and reasons over live **SerpApi** data to generate structured, justified recommendations
- Built a hotel-ranking algorithm that scores candidates by real-time driving commute duration to itinerary stops, integrating the **Google Distance Matrix API**
- Designed a full-stack architecture with a decoupled Express.js **REST backend** and a **React/TypeScript frontend**, including shared trip-state context and defensive **JSON parsing** with retry logic to handle unreliable LLM outputs
- Led a team of 2 through the full development and deployment lifecycle (**Vercel + Render**)

Skills

Languages: C++, C, Python, JavaScript

Web Development: React, HTML, CSS, Firebase

AI/ML: Gemini API, TF-IDF, Scikit-learn, XGBoost, LightGBM

Core CS: Data Structures & Algorithms, Git/GitHub

Soft Skills: Leadership, Collaboration, Event Management, Teamwork

Coding Profile: [LeetCode](#)

Achievements

- Won the **Best All Girls Team** at **Synapse.AI 2026**, a 24-hour offline hackathon organised by DTU Feb 2026
- Selected for Girl Script Summer of Code 2026 May 2026
- Won the She Fi Scholarship, Season 15 Sep 2025

Positions of Responsibilities

- Associate, Event Management**, Tech Needs, IGDTUW August 2025- Present
- Coordinator, Event Management**, Taarangana, IGDTUW Feb 2026- Present
